## 👤 Summary

2+ years of experience in technical mentorship and coding support, with a strong foundation in problem-solving, live technical guidance, and frontend/backend technologies like React, Java, and JavaScript. Highly motivated to transition my skills into a full-time software development role

## 📊 Skills

## 💼 Experience

### Nxtwave Disruptive Technologies

Associate Mentor

Nov 2022 - Present

Nuzvid, Andhra Pradesh

Dynamic Associate Mentor at NxtWave Disruptive Technologies with 2+ years of experience in guiding learners across frontend and backend technologies. Expert in ReactJS, Java, HTML, and JavaScript, having successfully resolved 25,000+ coding doubts. Proven ability to boost student understanding through interactive live sessions, realtime debugging, and personalized support—creating a collaborative and impactful learning environment.

## 📄 Projects

### Movies App – Netflix/Amazon Prime Clone

Live: [gopimovie.ccbp.tech](http://gopimovie.ccbp.tech)

Credentials: Username: rahul | Email: rahul@2021

- Developed a responsive OTT web application with features like trending movies, search functionality, detailed views, and user authentication.
- Designed user interface using Figma and implemented routing (Login, Home, Profile) with React Router.
- Integrated TMDb APIs to fetch dynamic movie data and handle secure login/authentication.
- Utilized React Slick for smooth horizontal scrolling of content and Bootstrap for responsive layout.
- Implemented protected routes and login persistence using local storage for better user experience.
- Tech Stack: HTML, CSS, JavaScript, React.js, Bootstrap, TMDb API

### Nxt Watch – YouTube Clone

Live: [gonxtwatch.ccbp.tech](http://gonxtwatch.ccbp.tech)

Credentials: Username: rahul | Email: rahul@2021

- Developed a fully functional YouTube-like app featuring video browsing (Trending, Gaming, Saved), search, detailed video views, and Light/Dark theme toggle.
- Built dynamic pages (Login, Home, Trending, Gaming, Saved) using React, utilizing props, state, event handlers, and form inputs.
- Integrated JWT authentication, storing login state securely in local storage and authorizing API requests with token headers.
- Implemented route protection to prevent unauthorized access, with automatic redirection to the login page for unauthenticated users.

- Tech Stack: React JS, JavaScript, CSS, Bootstrap, REST API, Local Storage, JWT, Routing, Authentication

## Education

**Rajiv Gandhi University Of Knowledge And Technology , Nuzvid, IIIT**

**BTech - Computer Science & Engineering, CGPA: 7.01**

*Nuzvid, Andhra Pradesh*
